Github: www.github.com/wesley-silva

.NET Developer with over **4 years of experience** in backend and full-stack development. Proficient in **C#, ASP.NET Core, Entity Framework, and SQL Server**. Proven track record in **performance optimization** (93% reduction in load times) and development of **scalable RESTful APIs**. Solid experience in **clean architecture, SOLID patterns**, and agile methodologies. Focused on delivering high-quality, high-performance solutions.

Professional Experience

Full Stack Developer, Remote | Sinqia – Software and Services Jun/2021 - Present
Main Responsibilities:
- Development and maintenance of web and desktop applications in .**NET Framework and .NET Core**
- Creation and implementation of **RESTful APIs** for system integration
- Development of responsive interfaces with **ASP.NET MVC and jQuery**
- **SQL Server database optimization** and performance analysis
- Implementation of **Clean Architecture** and **SOLID** standards

Main Achievements:
- **Critical performance optimization**: Reduced critical screen loading times from **10 minutes to 40 seconds (93% reduction)**
- **Overall system improvement**: Query optimization that reduced average time from **2 minutes to 20 seconds**
- Implementation of **good development practices** resulting in clean and easily maintainable code
- **Collaboration in agile teams** with consistent and on-time deliveries

Technologies: C#, VB.NET, ASP.NET MVC, ASP.NET Core, Entity Framework Core, SQL Server, jQuery, RESTful APIs

Software Developer | KCMS Intelligent Software Dec/2020 – Mar/2021
- Development and maintenance of **Windows Forms** applications using **C# and SQL Server**
- **Bug fixes**, code refactoring, and performance improvements
- Analysis and optimization of SQL queries
-

Technical Support | Borcol Rubber Industry Sep/2017 – Jun/2018
- **Requirements gathering** and system maintenance in **Clipper and PostgreSQL**
- Technical support for hardware and software
- Process analysis and documentation
-

Developer - Support | W12 Technological Innovations May/2016 – Apr/2017
- Implementation of new features using **C#, ASP.NET MVC, jQuery, and SQL Server**
- **Post-deployment** support to ensure quality and stability
- Technical support and troubleshooting in production

TECHNICAL PROJECTS

Ecommerce Enterprise - In development

Ecommerce Enterprise - In development
GitHub: github.com/Wesley-Silva/EcommerceEnterprise

Complete e-commerce web application with:
- Secure authentication (login/registration via email)
- Product catalog and shopping cart
- Checkout with multiple payment options (card, PayPal)
- Integration with payment gateways
- Automated email system and order tracking

Stack: ASP.NET Core MVC, Entity Framework Core, SQL Server, JWT Authentication

Financial API | Financial Management System
GitHub: github.com/Wesley-Silva/Financeiro-API

RESTful API for financial control with:
- Secure authentication via Identity and JWT
- Implementation of CQRS, Dependency Injection, and Generics
- Clean architecture focused on performance and scalability
- Complete control of expenses and revenues

Stack: .NET 7, Entity Framework Core, SQL Server, JWT, Clean Architecture

Custom Password Generator
GitHub: github.com/Wesley-Silva/GeradorSenha
Web system for generating passwords with **configurable rules** and a focus on **security**.
Stack: ASP.NET Core, C#

Education

Bachelor in Information Systems
Universidade Uniso Cidade Universitária | Sorocaba – SP | **2010 - 2015**

Courses and Certifications

- ASP.NET MVC 5 Course - developer.io (2020)
- Specialization in ASP.NET Core MVC - desenvolvedor.io (2024)
- ASP.NET Core Web API development - desenvolvedor.io (2020)
- Advanced Entity Framework Core Course - desenvolvedor.io (2020)
- Advanced SQL Server Certification – developer.io (2021)
- Angular Basic and Practical Course - desenvolvedor.io (2020)

Skills and Technologies

- **Languages**: C# and JavaScript
- **Frameworks and Libraries**: ASP.NET Core, .NET 7, Entity Framework Core and jQuery
- **Architecture and Standards**: RESTful API, CQRS, Dependency Injection, SOLID
- **Database**: SQL Server and Oracle
- **Tools and Platforms**: Git, Docker, Azure and Visual Studio
- **Others**: Unit tests and Clean Architecture
